

U.S. Patent Application Serial No. 09/318,614  
Amendment dated December 1, 2003  
Reply to OA of September 3, 2003

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Sub D  
c/m  
Claims 1-38 (Canceled)

Claim 39 (Currently Amended): A digital camera according to claim 38, wherein ,  
comprising:  
an imaging device for imaging a subject and outputting first image data having a first  
resolution;  
a generator for generating second image data having a second resolution which is lower than  
the first resolution based on the first image data outputted from said imaging device; and  
a writer for intermittently writing to a first memory the first image data outputted from  
memory at intervals of writing of the first image data, wherein said imaging device outputs the first  
image data in a raster scan manner, and said second writer writes the second image data to said first  
memory during a horizontal blanking period of the first image data.

Claim 40 (Currently Amended): A digital camera according to claim [[38]] 39, wherein  
the first image data has horizontal lines of a first number, the second image data has horizontal lines  
of a second number which is smaller than the first number, and said ~~second~~ writer writes to said first

memory, at every time the first image data corresponding to horizontal lines of a third number which is smaller than the first number is written to said first memory, the second image data corresponding to horizontal lines of a fourth number which is smaller than the second number.

cl  
cont

**Claim 41 (Previously Presented):** A digital camera according to claim 40, wherein the horizontal lines of the fourth number forming the second image data corresponds to the horizontal lines of the third number forming the first data.

**Claim 42 (Previously Presented):** A digital camera according to claim 40, wherein further comprising a vertical counter to count the number of pixels of the first image data outputted from said imaging device in a vertical direction so as to output a vertical count value.

**Claim 43 (Previously Presented):** A digital camera according to claim 42, wherein said generator includes an extractor for extracting pixel data from the first image data based on the vertical count value.

**Claim 44 (Previously Presented):** A digital camera according to claim 43, wherein said extractor includes a plurality of registers for shifting the first image data at every predetermined

amount, and an activator for intermittently activating said plurality of registers based on the vertical count value.

**Claim 45 (Currently Amended):** A digital camera according to claim 42, further comprising a second memory for ~~hold~~ holding the second image data generated by said generator, wherein said ~~second writer transfer~~ transfers the second image data corresponding to the horizontal lines of fourth number from said second memory to said first memory ~~to said first memory~~ when said vertical counter has counted the third number.
